

Sectoral Tentative Agreement in Principle

The FEESP-CSN School Sector Negotiating Committee has reached a tentative agreement in principle with the Comité patronal de négociation pour les centres de services scolaires francophones (CPNCF) and the Comité patronal de négociation pour les commissions scolaires anglophones (CPNCA) on sectoral matters affecting the working conditions of school support staff.

Your union delegates will soon be presented with this draft agreement.

Despite the agreement between the CPNCF, CPNCA, and the FEESP-CSN School Sector, unresolved issues at the central table remain. Salary issues, in particular, will need to be settled to avoid a Common Front unlimited general strike (GGI) in early 2024.

The final say is yours. Once an agreement in principle has been reached for both the sectoral and central tables, you will be asked to vote on the complete package at your local union general assembly.

Without your relentless mobilization over the last few months, and particularly the last few weeks, discussions with the management negotiating committees would most likely not have been concluded until 2024! Knowing that you were behind us at every negotiating session over the past year has ensured that we will never forget for whom and why we are negotiating.

We'll keep you updated as things develop.

In solidarity!

On The Right Side
